

PETROMIRALLES

MAXIMUM SECURITY BENEFITS FOR YOUR FUEL CARD

DYNAMIC PIN CODE

At PETROMIRALLES we work hard to offer high quality services, including advanced technology to increase the security of our fuel cards. This led us to develop a new safety feature within our Security Pack: The Dynamic Pin Code. In order to activate this system, a company representative must enter the Customer Account and sign up for the dynamic pin code. Instead of a fixed pin, the selected cards will have a new pin code for each transaction, which increases safety and avoids fraudulent use.

In order to purchase fuel using a fuel card with the dynamic pin code, the driver must follow these steps:

- Introduce the card in the terminal of the fuel dispenser.
- Within a few seconds a random pin code is sent to the card user's cell phone. This pin will only be valid for 20 minutes. After that, the pin will be disabled and the process must be started over.
- Enter the received pin code in the terminal.
- Proceed to fuel supply.

Using cards with a dynamic pin is the safest payment method for your fuel purchases.
